

Questionnaire**Code:****Age:****Class:****Gender:** ☐ Female ☐ Male ☐ Other ☐ Prefer not to answer

Instructions: Imagine being in the situations described below. Evaluate each situation in terms of how much anxiety you would feel during the specific event, putting an **X** in the column that corresponds to your level of anxiety. Remember that there are no right or wrong answers.

Situation	Level of anxiety				
	Very little	Little	Moderate	Quite a lot	A lot
Using multiplication tables and schemes to do math exercises					
Thinking about the math test scheduled for tomorrow					
Paying attention to the teacher solving a difficult math operation on the board					
Taking a written math test					
Doing many difficult math exercises at home for the next lesson					
Paying attention during math class					
Watching a classmate solve a math exercise					
Being questioned “by surprise” in math					
Dealing with a new math topic					

Instructions: Evaluate how good you think you are at handling the different situations described below. Put an **X** in the column that corresponds to your level of ability. Remember that there are no right or wrong answers.

How good are you at...	Not at all	A little	Medium	Quite	Very
Learning mathematics					
Solving math problems					
Mental calculation					
Solving operations in columns					
Multiplication tables					
Completing homework assigned for home					
Focusing on studying math without being distracted					
Committing to math study when you have other interesting things to do					
Organizing school activities					
Being interested in school subjects					

Questionnaire

Code:

Instructions: Evaluate how much you agree with the statements below by putting an **X** in the box that corresponds to your opinion. Remember that there are no right or wrong answers.

How much do you agree?	Not at all	A little	Medium	Quite	Very
I like studying mathematics					
Mathematics is useful in everyday life					
I would rather not have math lessons					
I find mathematics interesting					
I think mathematics will also be useful for my future					
Mathematics is a subject that motivates me to do my best					
I don't feel involved during math lessons					
I would like to go deeper into mathematics beyond what we do at school					

Instructions: Evaluate how much you agree with the statements below by putting an **X** in the box that corresponds to your opinion. Remember that there are no right or wrong answers.

How much do you agree?	Not at all	A little	Medium	Quite	Very
I worry that my classmates may think I have less math ability because of my gender					
When I get a bad grade in math I fear that it confirms the stereotype about my gender					
I think girls should not deal with mathematics because it is not suitable for them					
Sometimes I think I shouldn't be good at math because of my gender					
I worry that my math teacher may think I'm not good because of my gender					
In mathematics, boys have a natural talent that girls cannot make up for with effort					
To achieve the same results in mathematics, boys need to put in less effort					
Girls have to work harder than boys to achieve the same results in mathematics					
Despite effort, girls remain on average less good at mathematics than boys
